Google Earth Sustainable Program workshops were very educational, exciting and challenging. This has been an absolutely amazing & enlightening workshop. It really engaged me throughout the session. I learned a lot and also shared the same with my colleagues. We had faculty development programs in which my topic was experiential learning in online classes where I took this opportunity and included all the Google apps as a tool to enhance and improve learners. This is a very useful tool to create and make throughout learning experiential.

Totally enjoyed and learned a lot in a comfortable environment. I would like to thank Google teams, Dr. Fawzia and Ms. Priyal. The techniques and presenters were very amazing and made our learning smooth. It helped me to improve my skills and concepts. Specially Voyager stories is my favourite one, where I learnt different things and could correlate it with my lesson plan tools.
