2-day Training program on
"Surfing over cloud: Your first step to Geoinformatics"

Background:

Geoinformatics is an interdisciplinary subject having application in virtually every discipline. There is an increased dependency of organizations, businesses and governments on the integrative and analytical power of Geoinformatics to address real world issues. In last few years, Government of India has been taking unprecedented interest and measures in using geospatial technology for development and governance, and hence geospatial science and technology will be central for information management and dissemination. Geospatial technology is one of the major component in most of the flagship programs such as smart cities, digital India, Make in India, the Clean Ganga Project, energy, smart agriculture among several others. With these programs, the need of geospatial expert is going to increase substantially. This training program will be stepping stone to the field of Geoinformatics.

Professionals/students from any background can consider to learn this technology to apply in their field of interest.

Objectives:

This training program will help students to visualize the advantages of Geo spatial technologies. The major objectives of training program include imparting knowledge amongst youth graduates about:

1. Geo spatial technologies and its broader applications through hands-on training
2. Vast career opportunities in the field of Geoinformatics

Expected participants:

All the students (both undergraduate and post-graduate) and professionals who wish to build their career in the field of Geoinformatics.

Venue:

TERI School of Advanced Studies,
10 Institutional Area, Vasant Kunj, New Delhi 110070

Program Agenda:

Broad themes of the training Program are:

- Emerging trends in Geoinformatics and hands on training on various cloud based geoportal
- Career prospects in Geoinformatics

Registration Details:

Participants	Registration fee
Undergraduate Students	INR 750
Others	INR 2000

Website for Registration:

http://www.teriuniversity.ac.in/surfing_over_cloud/

Important deadlines:

Registration begins: Feb 18, 2018

Workshop date: March 26 – 27, 2018
