

Course title: Sustainable Provision and Management of Urban Services				
Course code: MEU 163		No. of credits: 3	L-T-P: 28-10-8	Learning hours: 42
Pre-requisite course code and title (if any): none				
Department: Energy and Environment				
Course coordinator:			Course instructor: Prof. Shaleen Singhal	
Contact details: shaleen.singhal@terisas.ac.in				
Course type: Compulsory			Course offered in: Semester 1	
Course description				
<p>Rapid urbanization is accentuating the pressure on urban services and making it difficult to provide urban services in a sustainable and equitable manner. Provision and delivery of resource-efficient, cost-effective, equitable and environment-friendly urban services is a first key step towards urban sustainability. Sustainable Provision and Management of Urban Services is a Semester I course offered to the M Tech Urban Development and Management programme students. This course introduces the complex issues related to the key urban services such as water supply, sewerage, solid waste, transport, energy and buildings. The comprehensive coverage of urban services is further advanced through a set of sector specific elective courses.</p> <p>The course is structured under seven modules: Module 1 introduces the status of urban services in India. Module 2 to module 6 respectively focus on the provision and management issues relating to municipal solid waste management, water and wastewater, sustainable urban transport, housing and buildings and energy. Module 7 is focuses on benchmarking and performance measurement aspects of urban services.</p>				
Course objectives				
To impart foundational knowledge of multi-dimensional and complex issues related to key urban services such as water supply, sewerage, solid waste, transport, energy and buildings.				
Course contents				
Module	Topic	L	T	P
1	Module 1: Status of urban services in India <ul style="list-style-type: none"> ▪ Towards sustainable urban services ▪ Overview of urban infrastructure and services in Indian cities ▪ Introduction to assignments 	4		
2	Module 2: Municipal Solid Waste (MSW) management <ul style="list-style-type: none"> ▪ MSW management: collection transportation and disposal ▪ MSW management: innovative technological interventions 	4	2	
3	Module 3: Water and wastewater <ul style="list-style-type: none"> ▪ Water supply challenges and technology ▪ Water conservation, demand management and pricing ▪ Wastewater management; treatment technology and reuse ▪ Business models case studies 	4	2	
4	Module 4: Sustainable transport <ul style="list-style-type: none"> ▪ Sustainable and low carbon transport: parameters for inter-city and intra-city transport 	4		

	<ul style="list-style-type: none"> ▪ Sustainable and low carbon urban transport: issues and interventions 			
5	Module 5: Housing and buildings <ul style="list-style-type: none"> ▪ Sustainable habitat and green buildings ▪ Green buildings rating methods 	4		8
6	Module 6: Energy in provision of services <ul style="list-style-type: none"> ▪ Energy efficiency management in utilities ▪ Energy access 	2	2	
7	Module 7: Service benchmarking <ul style="list-style-type: none"> ▪ Service level benchmarks ▪ Performance measurement approach to service management ▪ Urban services and health impacts on urban poor ▪ Studio sessions: assignment progress 	6	4	
	Total	28	10	8
Evaluation criteria:				
Test 1 : 20 %				
Project Work : 40 %				
Test 3 : 40 %				
Learning outcomes				
On successfully completing this course the students will be able to:				
1. Gain exposure to the key management issues on challenges in the provision of urban services such as water supply, sewerage, solid waste, transport, energy and buildings				
2. Enhance knowledge and understanding of the multi-dimensional and complex systems relating to delivery of and ways to manage urban services in a sustainable manner.				
Pedagogical approach				
The course will be delivered through a mix of classroom lectures and case studies discussions.
