Minutes of the Board of Studies Meeting

Department of Business & Sustainability TERI School of Advanced Studies

Dated (email): July 3, 2020

Mode: Online through email

Members:

Prof. Madhu Vij Prof. Vivek Suneja Prof. Manipadma Datta Dr. Jaya Vasudevan Dr. Shruti Rana Sharma Dr. Montu Bose

Agenda:

Following documents are shared with the committee members for their approval -

- 1. MBA updated Course Outline;
- 2. PhD programme outline for the Department of Business & Sustainability;
- 3. Programme specific outcome for MBA(BS) & MBA(Infrastructure);
- 4. Major Project & Minor Project course outline for MBA(BS) and MBA(Infrastructure).

Minutes:

Agenda #1: Following courses have been shared with the BoS members. Members have reviewed and approved the courses. The courses are available in the annexure-1.

Agenda #2: PhD programme outline has been reviewed and approved by all the BoS members. The outline is available in annexure-2.

Agenda #3: Programme specific outcome of MBA programmes have been approved by the BoS members. The programme specific outcome of the programmes are as follows –

Program Specific Outcome (MBA Business Sustainability):

At the end of pursuing the MBA (Business Sustainability) program the students are expected achieve the following -

- Ability to formulate, evaluate and implement crucial business strategies with core facets of Finance, Marketing and Sustainability;
- Competence to make ethical business decisions with social and environmental consciousness;
- Leadership and teamwork mastery of problem solving in a resource-sensitive world amid increasing competition;
- Training in tools, techniques, and frameworks for developing critical thinking & communication skills;
- Develop expertise to recognize the need, challenges and ways to approach for sustainable businesses through resource optimization without compromising on profitability and competitiveness;
- Gain hands-on experience in applying business, economic, management, legal and sustainability concepts & practice along training in quantitative and qualitative methods of research.

Programme specific outcome (MBA Infrastructure):

At the end of pursuing the MBA (Infrastructure) program the students are expected to:

• Gain in-depth knowledge of the functional areas of Infrastructure Management domain;

- Acquire expertise to apply management techniques in the infrastructure sector to lead in a resource-sensitive world amid increasing competition and sustainability concerns;
- Develop key analytical skills in identification and resolution of issues pertaining to the regulation and management of infrastructure regime;
- Evolve sustainable domain perspectives for the purpose of planning, implementation, and control of businesses in the infrastructure sector;
- Develop and apply skills of quantitative and qualitative research for practical evaluation of major policy issues through industry exposures and field visits;
- Accustom to the global perspective towards sustainable business practices in the area of Infrastructure Management;

Agenda #4: The major and minor project course outline of the MBA programmes have been reviewed and approved by the BoS members. The course outlines are available in annexure-3.

Secretary, Board of Studies Programme Coordinator, MBA Programmes Department of Business & Sustainability

Marpome de.

Chairman, Board of Studies Department of Business & Sustainability

Evaluation criteria

- Test 1: Written Test 25%
- Test 2: Class exercise 15% (Practical live examples solved in class)
 - Identification of a project live or hypothetical and carry out PM related SOP's, time schedule development, cost management plan, HR, procurement and close out stages.
 - Question / answer sessions on the same project
- Test 3: Presentation 20% (Topic based presentation submitting the hard as well soft copy)
- □ Test 4: Written test 40%

Learning Outcome

After the course, the students will be able to

- Develop, plan, implement and monitor projects.
- Handle the group dynamics that remain crucial for a successful project implementation.
- Management effectively the techno-legal factors involved in projects.
- Develop skills to work for goal congruence with reference to overall organizational key objectives.

Pedagogical approach

The course will be delivered through lectures and discussion of case studies, research papers and articles.

Jourse description

Risk is all pervasive. For business the various kinds of risk relate to price, interest rates, foreign exchange rates, credit etc. Of late tactical management of these risks has gained prominence especially with advent of derivative products. The course concerns with tactical management of these risk through investment in financialassets. More specifically, the course will deal with the pricing and use of financial derivatives, including options, forwards, futures, swaps and credit derivatives as risk management tools. Financial derivatives are used by institutions as well as investors, sometimes to hedge (reduce) unwanted risks, sometimes to take on additional risk motivated by views regarding future market movements. Through this perspective, the course will also highlight the uses and abuses of financial derivatives with respect to the various incidents that had already happened in the markets.

Course objectives

The objective of this course is to familiarize the participants with the various instruments available for risk management. It covers rather simpler instruments such as options, futures, swaps, and credit derivatives. Besides discussing the pricing of these instruments and hedging principles the course would also aim at introduction of some complex instruments such as options on futures and swapsetc.

- Test 1: Class Participation 10% •
- Test 2: Project 30% •
- Test 3: Written Test 20% •
- Test 4: Written test 40% •

Learning Outcomes:

On successful completion of the course students will be able to:

Recognize the role of derivatives in financial risk management.
 Demonstrate critical thinking, analytical and problem-solving skills in the context of derivatives pricing and hedging practice.
 Evaluate alternative risk management strategies and tactics.

4. Demonstrate an understanding of pricing forwards, futures and options contracts.

Pedagogical approach

The course will be delivered through lectures and discussion of case studies, practical in Finance Lab, research papers and articles.

Additional information (if any)

Modules

Sessions plan as above would be followed with following module objectives:

An overview of risk and derivatives:

The objective of the session is to draw distinction between various kinds of risks that a firm is exposed to. Some of these risks are manageable with derivative instrument. The session on Introduction to derivatives is intended to provide an overview of derivatives, their characteristics and misconceptions about them.

Forwards and Futures:

These sessions are aimed at introducing the terminology of forwards and futures, their applications of hedging fro variety of underlying assets such as commodities, currencies, stocks and interest rates. This would also cover the pricing principles and methods of trading, settlement etc. Separate sessions for commodities, currencies and stock indices would deal extensively with the examples of hedging, speculation and arbitrage.

Options:

Sessions on options are aimed at developing an understanding about the complex nature of the derivative. The objective is to familiarize the participants with the various ways to value options. Hedging using options would be discussed in details with suitable real life applications. Trading strategies with options would deliberate upon how the combination of options can be used to achieve the desired risk profiles of different classes of investors. Sessions on exotic options would concentrate on how the parameters of options can be modified to suit the individual needs of hedging and cost associated with them.

Swaps and Interest Rate Derivatives:

These sessions are useful for the sectors such as banking, construction and infrastructure that are sensitive to broad economic factors and interest rate structures and changes in them. The tools of managing the interest rate risk would be introduced with emphasis on swaps and interest rate futures.

Student responsibilities

All students are expected to read the assigned readings prior to the class. Students are expected to analyze the case following the 'discussion questions'. All students must maintain full attendance and do timely submission of assignments. Full Class Participation is expected from all students.

Learning Outcomes: Upon completion of this course, the students will be able to:

- Understand various principles on which financial statements are prepared. (Modules #1, #2, #3, #5))
- Understand how an Accounting Information System (AIS) works. (Modules #6, #7, #8)
- Acquire skills to fortify managerial ability with utilizing accounting information for a conscious decision making. (Modules #9, #10, #11).
- Develop a basic understanding of cost accounting(Module #12).
- Develop an overall understanding of emerging corporate reporting framework in the context of International Financial Reporting Standards (IFRS). (Module #13)

Pedagogical approach

The course will be delivered through lectures and discussion of case studies, videos, annual reports of the companies, research papers and newspaper articles.

Additional information (if any)

Attendance

All exams are based on lecture and classroom discussion. Attendance will be taken on a regular basis and it is expected that all students attend ALL sessions which will be counted for overall grade. Showing up late for class, use of gadgets (mobile phones,tablets or laptops etc.) during class is disruptive and should be avoided

Student responsibilities

Attendance, feedback, discipline etc.

| | Case 5: Centuryply Case 6: Reebok | | | |
| | Leveraging Secondary Brand Associations to Build Brand Equity | | | |

Evaluation criteria:

Performance is evaluated on the following parameters:

- 1. Test 1: Group-based Case Analysis :20%
- 2. Test 2: Group-based Branding Project
- (Study and its Report) :30% 3. Test 3: Class Participation :10%
- 4. Test4: Written Test :40%

Indicators for Assessment: Group Based Case Analysis: Identification of the actual Decision-Making problem/Issues, Identification of appropriate data, Quality of analysis of data from within the case, Clarity in presentation of relevant conclusions that address the problems identified.

Group Based Branding Project: Formulation/definition of the actual Research Problem, Collection of appropriate primary and secondary data related to Brand chosen for study, Quality of analysis of data, Clarity in presentation of relevant conclusions that state various aspects of the Brand and its current status and future outlook.

Class Participation: Appropriateness of the response to the queries raised by faculty member and fellow students during classroom session, quality of contribution to case analysis/discussions, quality of questions raised in class for furthering the discussions around brands and branding.

Test: Accuracy of answers as well as robustness of analysis in response to questions asked in the examination.

Learning Outcomes

After completing the course, the students will be able to

- 1. Develop a professional understanding of Brand management decisions that must be made to build, measure and manage brand equity (Group Based Case Analysis).
- 2. Familiarize themselves with the art of applying direct and indirect measures of brand equity and choosing brand elements and develop marketing programs. (Group Based Branding project, Class Participation).
- 3. Consolidating all the learning related to theory and application of Branding theory and practice (Test 4).

Pedagogical approach

The course will be delivered through lectures and discussion of case studies, research papers and articles.

| Course description: | | | |
| An important element of any corporate organization, during its interactions with its external environm | | | |
| ethical issues. What does business consider as acceptable /unacceptable and the extent to which it acce some key issues for study in this course. | epts its re | esponsi | onity are |
| From time to time corporate scandals have demonstrated that managerial decision-making invariably l | has ethic | al impli | cations. |
| However, these ethical implications are seldom given any serious thought and get viewed as just bypro- | | | |
| action, instead of understanding that they comprise the prime ingredients of business decisions. | | | |
| This course on Business Ethics will provide the students with the various frameworks, often conflicting | | | |
| by moral philosophers to guide in the handling of ethical dilemmas. Additionally, it will help them to fi | | | their |
| inner concerns and values, in a meaningful way, when they are confronted by such ethical issues in life | and at w | /ork. | |
| Course objectives: | | | |
| The course on Business Ethics will focus on the perspective of managers who must formulate policies | to addre | ess issue | es based |
| on ethical dimensions. The principal objective of the course is to infuse a basic ethical intuition among | g the nex | t genera | ation |
| managers on issues such as well-being, rights, and justice. | | - | |
| Module Topic | L | Т | Р |
| 1 Module 1: Introduction to Business Ethics | 2 | | |
| Course Introduction, Pedagogy and evaluation pattern discussion | | | |
| followed by an ice-breaker session. A broad introduction to the various Ethical | | | |
| frameworks will be provided and students would be introduced to the book "Justice" | | | |
| by the Harvard don, Michael Sandel. Module 2: Framework for Civing Voice to Values (CVV) | 2 | | |
| - Would 2. Framework for Giving voice to values (GVV) | 2 | | |
| An introduction to the framework developed by Dr Mary Gentile on how to "speak" | | | |
| up for your convictions. This framework would be used right through the course in parallel to the theoretical ethical frameworks. | | | |
| | 2 | | |
| Filter of Filter Filmework for Edites versus corporate Social Responsionity | 2 | | |
| The importance of CSR in today's business and how Business Ethics differs from CSR | 0 | | |
| 4 Module 4: Moral Framework for Ethics /Ethics in Business | 8 | | |
| An appreciation of the various Framework/Theories for addressing Ethical Dilemma – | | | |
| Utilitarian, Rights, Duty, Egalitarian, Aristotelian -using case studies (from Prof | | | |
| Sandel's online course) the objective would be for students to see that there are multiple | | | |
| ways to look at the same ethical issue. | | | |
| Students will be given a brief introduction to the principles of all leading Ethical | | | |
| Theories and their founding thinkers. | | | |
| 5 Module 5: Moral Framework for Ethics/Ethics in a Global Economy | 2 | | |
| Discuss cross cultural and cross-national issues on Ethical behaviour by businesses | | | |
| across different countries across the world with some examples/case lets. | | | |
| | | | |
| 6 Module 6: Moral Framework for Ethics/Ethics and Environment | 2 | | |
| 6 Module 6: Moral Framework for Ethics/Ethics and Environment Understand new trends in environmentalism and the emerging role of interest groups, | 2 | | |

| | changed over the years. | | | |
|---------------------|---|--------|----------|---------|
| 7 | Module 7: Ethical Standards | 2 | | |
| | These sessions will introduce the 8 principles that make up the GBS Codex and will | | | |
| | introduce the students to some example of Code of Ethics followed by leading | | | |
| | organizations. | | | |
| Group P | resentation- Case Studies I | 4 | | |
| - | small group assignments the class will analyse situations involving ethical dilemmas and | | | |
| - | ebate possible solutions. | | | |
| | resentation – Case Studies II | 4 | | |
| - | ss the issue of how real-life ethical dilemmas should be handled, the class will be divided into | | | |
| | d the groups will be asked to prepare a common case study and present it to the rest of the | | | |
| | bup assignments will be around current, real life ethical issues from what we see around us, | | | |
| | | | | |
| | ce one group could research some the modern ethical dilemma like say the issue around the | | | |
| | ivacy and details on Aadhar being provided to the Government, another group could examine | | | |

PhD Programme- DBS

Programme Overview:

The PhD programme at the Department of Business Sustainability aims to promote interdisciplinary research and scholarship on sustainability studies pertaining to businesses. It provides an opportunity to scholars to enhance their professional competence and expertise through continuing education and learning demonstrating individual intellectual potential. The entire learning process spanning across diverse issues of sustainability will equip them to learn how to manage and evaluate a scientific research work from its designing to the successful completion of the work. At the same time, this programme also caters to the need of capacity building both in industry and academics. Industry people with experience get the chance of honing their understanding the emerging perspectives in the corporate world. Academic aspirants get the chance to strengthen their knowledge base to meet the increasing demand of good teachers.

Programme USP:

The Programme fosters knowledge creation by enabling one's intellectual skills through innovative research work and contribute to the discourse on sustainability issues in business activities. It advances impactful and cutting-edge interdisciplinary research demonstrating with opportunities for broader research excellence framework. The basic objective is to prepare students to play a remarkable role in the world academic circle and to develop significant unique contributions to their selected area of research.

Programme Specific Outcome:

At the end of their PhD course, students should be able to:

- Explore newer frontiers of interdisciplinary teaching & research;
- Make significant contribution to the corporate world;
- Comprehend scientific methods and techniques of doctoral research;
- Develop effective collaboration with allied research partners & industries;
- Carry out individual research work with wider societal impact;
- Integrate ethical values in original scientific research;
- Independent planning and implementation of research;

Programmes Structure

Ph.D. Programme are divided into three stages. These are as follows: -

Stage I - Ph.D. Course work:

The Ph.D. course work at TERI SAS is designed to develop rigorous research and analytical skills among the students. It is intended to equip them with the necessary research and analytical skill sets. The Ph.D. Course work is governed by the 'TERI School of Advanced Studies Ph.D. Regulations-2019' (and subsequent amendments) and UGC (Minimum Standards and Procedure for Award of M.Phil./Ph.D. Degrees) Regulations, 2016 (and subsequent amendments).

Ph.D. Course work structure and requirement:

A minimum of 8 credits and a maximum of 16 credits will have to completed by the Ph.D. students in order to complete their course work. Some courses are mandatory in nature, and some are prescribed by the Department Research Committee (DRC)/ Centre Research Committee (CRC) on the recommendations of the Student Research Committee (SRC). The Ph.D. course work must be completed within the first two semesters of joining the programme.

Every Ph.D. student must complete the following mandatory courses.

- a) Research Methodology 3 Credit Course (Credit only course)
- b) Research and Publication Ethics 2 Credit course (Credit or audit course)
- c) Quantitative Research Method minimum 2 Credit course from the list of quantitative methods course as prepared by the respective DRC/CRC

There are additional mandatory courses for students registering in some of the departments. Ph.D. students may also opt for 'Communication Skills', a non-mandatory course. Other advanced level courses from the list of courses offered for Master's Programmes may also be prescribed by SRC after considering the student's background in relation to the proposed topic of research.

Stage II - Research proposal defense and research work:

- A student will be permitted to appear for defending his/her research proposal only after he/she has completed the Ph.D. course work as decided by the SRC.
- As a part of the research proposal defence, a draft research proposal must be prepared in the prescribed format by the student in consultation with the Supervisor(s).
- The Supervisor will schedule the research proposal defence.
- After a satisfactory defence, the student will submit his/her final research proposal and related documents to the DRC/CRC with due approval from the Supervisor. The final research proposal must be submitted to the DRC/CRC within a period of 24 months from the date of registration to the Ph.D. programme.
- During the Ph.D. programme, the student shall appear before the SRC at least once in each semester to make a presentation of the progress of his/her work. This process will continue until thesis submission.

Stage III- Thesis submission:

A Ph.D. student may submit his/her thesis, in the prescribed format, at any time provided that he/she has completed the minimum period of registration and complied with all the necessary requirements as specified in "TERI School of Advanced Studies Ph.D. Regulations-2019" (and

subsequent amendments). Prior to the thesis submission, the student shall make a presentation in the Department. A Ph.D. student must submit his/her thesis within the stipulated period, failing which his/her registration will be considered null and void.

University Wide List of Available Courses Under Quantitative Method Category

- Environmental Statistics (3 credits)
- Probability and Statistics (4 credits)
- Statistical Methods for Management (3 credits)
- Advanced Statistical Methods for Management (2 credits)
- Multivariate Data Analysis (3 credits)
- Econometrics (4 credits)
- Advanced Econometrics (4 credits)
- Time Series and Regression Analysis (4 credits)
- Quantitative Analysis for Development Practice (3 credits)
- Spatiotemporal Data Analysis (3 credits)

Course description

The course offers a practical learning approach, guided by real business-related problems. During the major project, a student should work as an intern at least for 15 weeks at the project location/corporate sector and gain on-job training. The primary focus of the project is to enable students to deal with business/industry-related problems through supervised self-learning approach. Based on the need of the interning organization, the students should work on specific thematic areas like finance, economics, sustainability, CSR, business, management, policy & regulations during the internship. The students should identify the problem(s), review literature, analyse data/information, derive inferences from the information and/or complete similar other tasks assigned by the host organizations. The students are expected to implement their classroom learning's, managerial skills for the preparation of the major project report.

Course objectives

- To develop the experience to work in corporate /industries as a team to meet the deadlines and targets;
- To train students to use analytical skills and knowledge for addressing problems/challenges in contemporary areas business, management and its sustainability;
- To impart skills and training relevant to the specific areas of business and management;
- To enable the students to execute independent research work and to solve real business-related problem.

Course contents

| Module | Торіс | L | Т | Р |
|--------|--|----|----|----|
| 1 | Broad problem identification on thematic area in consultation with the host industry/organization Define overall aims and objective and relevant research questions and research objectives to be addressed | NA | NA | NA |
| 2 | Define methodology to be followed and identify materials/tools to be used for achieving each objective Systematic review of literature, internal or external reports etc. relevant on the specific problem and create benchmark | NA | NA | NA |
| 3 | Data collection/ system design/modeling/field survey/experimental or other relevant work depending on the objectives Analysis and interpretation of the findings/results/data | NA | NA | NA |

| | ٠ | Developing overall conclusion based on inferences and findings and enlisting the limitations of the work. | | |
|--|-------|--|--|--|
| | Total | | | |

Evaluation criteria

- Presentation and viva (30%)
- Dissertation (40%)
- Timeline adherence (10%) [Consisting of: joining report (1%), synopsis (1%), progress report-1,2 & 3 (1% each), feedback Final draft for presentation (2%), final dissertation (3%)]
- Feedback from the Host Organization/Supervisor (20%)

Learning outcomes

- Develop an understanding of problems/challenges in contemporary areas of business, management, finance and economics.
- To gain necessary skills through on-job training on various aspects such as problem identification, analyse data, report writing, team-work etc.
- To effectively communicate and demonstrate the learning through structured thesis/dissertation and oral presentation

Pedagogical approach

Self-learning; discussion with the supervisors; interaction with experts; field work etc.

Materials

Peer-reviewed journal articles

Reputed conference proceedings

Reports related to the specific project

Learning materials provided by the host organization

Additional information (if any)

A detailed guideline along with important dates and format will be notified by the department, in advance, with other relevant details.

If there is any change in evaluation criteria/policy, it will be updated in the guideline every year.

Dissertation submission and schedule of presentation will be coordinated by Project coordinators.

• If plagiarism is detected using plagiarism checking software (e.g. Turnitin), it will be referred to the MPEC (comprising of supervisors and faculty members), which would take a decision and penalty to be imposed/disciplinary action to be taken. The guidelines for the MPEC are as follows:

| Levels of Plagiarism | Percentage of similarity | Maximum percentage marks to be deducted from dissertation/thesis |
|-------------------------|--------------------------|--|
| Level 3 | > 60% | Students' registration to the program stands cancelled |
| Level 2 | $>40\% \le 60\%$ | Student repeats the course next year |
| Level 1 | > 10% ≤ 40% | The student is required to resubmit the report after necessary changes within the deadline |

| Level 0 | $\leq 10\%$ | 0% | |
|---------|-------------|----|--|
| | | | |

•The students scoring less than or equal to 50% (or \leq 50%) overall marks in the evaluation would be considered to have failed in this course. Grading of the Major Project will be absolute in nature and would be done as per the following criteria:

| > 90 | A+ |
