Course title: Multivariate Data Analysis

Course code: NRE 112  No. of credits: 3  L-T-P: 28-14-0  Learning hours: 42

Pre-requisite course code and title (if any): NRE 115 Environmental Statistics

Department: Department of Energy and Environment

Course coordinator(s):  Course instructor(s): Mr Kaushik Roy Chowdhury

Contact details: guest.faculty16@terisas.ac.in

Course type: Elective  Course offered in: Semester 3

Course Description
Large amount of data is collected on many different variables across disciplines in order to understand the underlying process(es). The multivariate analysis of data deals with examining interrelationship between three or more equally important variables or explaining of variation in, usually one (or more than one) dependent variable(s) on the basis of two or more independent (explaining) variables. With the availability of inexpensive, fast and efficient computing resources and statistical packages there has been a growth in the application of these techniques. This course introduces the student to various multivariate data analysis tools. The focus is on cross-disciplinary application of these techniques.

Course objectives
- Introduce the language of multivariate data analysis
- Understand the characteristics of multivariate quantitative research, including strengths and weaknesses
- Understand the principles and characteristics of the multivariate data analysis techniques

Evaluation criteria
- Test 1: 15%
- Test 2: 15%
- Assignment/viva voce: 20%
- Test 3: 50%

Learning outcomes
- distinguish between dependence and interdependence methods in multivariate data analysis
- identify the most appropriate statistical techniques for a multivariate dataset
- carry out and apply commonly used multivariate data analysis techniques, and interpret results
- use statistical software packages for the analysis of multivariate data

Pedagogical approach

Materials
Required text

**Suggested readings**

Case studies
Websites

**Journals**
Applied Statistics
Biometrics
Biometrika
Environmental and Ecological Statistics
Environmetrics
Journal of the American Statistical Association
Psychometrika
Statistical Science
Technometrics
The American Statistician

**Additional information (if any)**

**Student responsibilities**
The students are expected to submit assignments in time and come prepared with readings when provided.

**Course Reviewers**
