Course description					
<p>It's not only important to create wealth. It's more important to ensure that such wealth is best managed. Unless it's efficiently channelized to the best possible investments, no nation can grow. Financial intermediation is a process that helps the prospective saver-investors facilitate the productive use of the surplus wealth with reduced risk of judgment. Financial intermediaries thus play a very important role in a nation's economy. Nations with stronger and better regulated network of financial institutions and markets are found to be better developed.</p> <p>This course is designed to familiarize the students with the Indian scenario in a global context. This will help them to understand and develop expertise for making the best of financial decisions as management professionals.</p>					
Course objectives					
<p>To develop an understanding of the working of various segments of the finance markets.</p> <p>To develop an understanding of the working of the financial system the manager has to interact with.</p> <p>To develop a holistic perspective about all the financial institutions and their economic significance.</p>
