

<b>Course title: Introduction to Sustainable Development</b>				
<b>Course code:</b> PPS 175		<b>No. of credits:</b> 1	<b>L-T-P:</b> 11-4-0	<b>Learning hours:</b> 15
<b>Pre-requisite course code and title (if any):</b> None				
<b>Department:</b> Policy and Management Studies				
<b>Course coordinator(s):</b> Dr. Mala Narang Reddy			<b>Course instructor(s):</b> Dr. Mala Narang Reddy	
<b>Contact details:</b> <a href="mailto:malanarang@gmail.com">malanarang@gmail.com</a>				
<b>Course type:</b> Core			<b>Course offered in:</b> Semester 1	
<b>Course description</b>				
<p>The course seeks to build an inter-disciplinary perspective on understanding sustainable development concerns and challenges. It familiarizes students with current debates and perspectives on various development issues.</p> <p>The course begins with the history of ideas and events that relate to the evolution of the concept of sustainable development. Then it presents a holistic overview of the problems of poverty, population, health, education, gender disparity and environmental conservation, and looks at how these problems can be dealt with sustainably. While discussing sustainable practices in these areas, the course exposes students to the complex relationships between social, economic and environmental processes, and also highlights the need for more integrated approaches and policies.</p>				
<b>Course objectives</b>				
<ul style="list-style-type: none"> <li>▪ To build an inter-disciplinary perspective for understanding the current social and environmental challenges.</li> <li>▪ To highlight the magnitude of problems with the help of quantitative data and case studies.</li> <li>▪ 3. - Sachs, J. 2015. The Age of Sustainable Development. Columbia University Press.

*There are no compulsory readings for this course.*

*Additional relevant articles will be shared as the course progresses.*

**Recommended journals for reference**

Economic and Political Weekly

World Development

**Additional information*****Guidelines for Assignment***

Students can work in groups or individually on a sustainable development problem. They can also work on a policy or a development project / program. Topics will be suggested by the teacher as well. The term paper should be within 1500 - 2000 words. It should look at some quantitative data or case studies to highlight the problem, also present the causes, effects, policies / programs related to it, and some suggestions or recommendations.

It is important to mention references in the end.

**Student responsibilities**

Attendance, feedback, discipline, guest faculty etc
