<b>Course description:</b>				
<p>In today's academic world, research ethics is a trending topic. Although conducting research is fascinating, it also entails certain inherent challenges that involve very different ethical issues, such as bias, plagiarism, conflicts of interest, falsification of research results, informed consent, determination of authorship and adequacy of peer review publication processes. With the adequate combination of both theory and practice, this course will certainly help students critically analyzing research philosophy, ethics and case studies in an independent manner. From the pedagogical point of view, they will learn how to manage and evaluate a research work from the very preliminary stage of identifying ethical standards until the final publication of the work. Significantly, through this comprehensive course, students are motivated to address the impact of new technologies and social trends on research ethics and deliberate upon their ideas as to how to rebuild necessary codes of conduct to regulate multidisciplinary research activity. In the process of evaluating and critically debating issues relating to research philosophy and ethics in an exhaustive manner, students will necessarily comprehend the importance of scientific integrity in academic research. Thus, ensues acquisition of relevant reasoning skills that significantly increase the scope of sustainable scientific quality in their future research.</p>				
<b>Course objectives:</b>				
<p>The purpose of this course is to engage student researchers in reading about, understanding and discussing the responsible code of conduct of interdisciplinary scientific research. Specific learning objectives with respect to research ethics include:</p> <ul style="list-style-type: none"> <li>• To know rules, issues, options, and resources for research ethics</li> <li>• To familiarize with various institutional ethics review boards/academic integrity guidelines</li> <li>• To understand the purpose and value of ethical decision-making</li> <li>• To have a positive disposition towards continued learning about research ethics</li> </ul>				
<b>Course Overview:</b>				
<p>This course has a total seven modules focusing on the basics of philosophy of research and ethics, research integrity and publication ethics in general. Practical sessions are designed to identify areas of research misconduct and predatory publications. Indexing and citation databases, open access publications, research metrics and plagiarism tools will be introduced as part of this course.</p>

**Evaluation criteria:**

Continuous assessment will be done through classroom practical exercises, assignments, quizzes or group discussions. Student evaluation will be based on the term paper and the book review followed by the final major test to be conducted at the end of the course.

This course has seven modules in total.

- **Test 1:** Term Paper (written Submission based on modules 1,2 &3 -25%)
- **Test 2:** Book Review (Relevant to the area of Research-25%)
- **Test 3:** Major Test (Based on all modules-40%)
- **Class Participation:** (10%)

**Learning outcomes:**

On completion of this course, the students would be able to:

- i. To have a positive disposition towards continued learning about research philosophy & ethics
- ii. To know Rules, Regulations, Issues, Options, and Scientific Resources of Research Ethics
- iii. To learn the culture of fairness, honesty and integrity in academic communications and to understand the purpose and value of ethical decision-making
- iv. Avoid wasteful and duplicate publications & encourage original contributions to advance Academic Research and Scholarship
- v. Acquiring knowledge & professional competence and expertise about Patents, Copyrights, and other forms of Intellectual Property Rights
- vi. To promote social good and prevent or mitigate societal hazards through innovative ideas,

creativity and research advocacy

**Pedagogical Approach:**

- Classroom lectures and tutorials, guest lectures, group activity and practical sessions with a significant focus on the detailed discussion of original research articles from scientific journals in class.
- Weightage will be given for active class participation.

**Employability:**

- i. Academic and Industrial Research involving *multidisciplinary* approach
- ii. Academic Supervision to educate, mentor, and advise students
- iii. Gain experience and advance knowledge of IPR Issues in Educational/Literary Works
- iv. Promotion of research integrity through awareness of academic campaigns
