

Inderveer Singh

Inderveer's entrepreneurial journey started in 2014, which led to the formation of EVage and conception of their first product – a four-wheeler, 1-Tonne commercial vehicle. As Founder and CEO, Inderveer is on a mission to lead EVage's mobility transformation dream for India and the world.

After completing his graduation he joined one of the top Automotive/Forging companies in India, where he was responsible for the growth of the company and was instrumental in setting up the R&D division from scratch. The R&D division led the charter for developing essential products and growing the business multifold in 8 years. He managed and expanded the business with Tier 1 OEs across the globe. He has also had a two-year stint in the US, where he set up a manufacturing facility that catered to the demand of North American clients.

With over ten years of extensive automotive experience spanning R&D, Plant Management, and Business and Sales Experience, he has also had the privilege of being mentored by Prof. Hitoshi Kume in TQM and Breakthrough Management from *in* Japan.

His curious mind and the ability to create innovative products are traits he has had since childhood – he created his first electric vehicle when he was just a teenager and dabbled with Window Cleaning Bots, Exoskeletons, HVAC Duct Cleaning & Sanitising Bots, to name a few.

Inderveer's ambition is to have the world's most empowered talent pool of engineers, innovators, techies and designers to come under the EVage banner.
